

**Amendments to the Claims:**

This listing of the claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1 (Original). A method for inhibiting aggregation of  $\beta$ -amyloid in a subject or disaggregating aggregated  $\beta$ -amyloid in a subject, comprising administering to a subject in need thereof an effective amount of a filamentous bacteriophage which displays an epitope of  $\beta$ -amyloid so as to elicit antibodies against said epitope in said subject, wherein said antibodies inhibit aggregation of said  $\beta$ -amyloid in said subject and/or cause disaggregation of said  $\beta$ -amyloid aggregate in said subject.

2 (Original). The method of claim 1, wherein said bacteriophage propagates in bacterial flora in said recipient.

3 (Original). The method of claim 1, wherein said bacteriophage propagates in *Escherichia coli*.

4 (Original). The method of claim 1, wherein said bacteriophage is fd.

5 (Original). The method of claim 1, wherein said filamentous bacteriophage which displays an epitope of  $\beta$ -amyloid is selected such that less than 30 days following an introduction of a triple dose of  $10^{10}$  units thereof to the

recipient, a titer of said antibodies is above 1:50,000, as is determined by ELISA.

6 (Original). A method in accordance with claim 1, wherein said epitope of  $\beta$ -amyloid is displayed via coat glycoprotein VIII on said bacteriophage.

7 (Original). A method in accordance with claim 1, wherein said bacteriophage is M13.

8 (Original). A method in accordance with claim 1, wherein said bacteriophage displays SEQ ID NO:1.

9 (Withdrawn). A method in accordance with claim 1, wherein said bacteriophage displays a peptide selected from the group consisting of SEQ ID NO:3, SEQ ID NO:7, SEQ ID NO:8, SEQ ID NO:21, and SEQ ID NO:22.

10 (Original). A method in accordance with claim 8, wherein said epitope of  $\beta$ -amyloid is displayed via coat glycoprotein VIII on said bacteriophage.

11 (Withdrawn). A method in accordance with claim 9, wherein said epitope of  $\beta$ -amyloid is displayed via coat glycoprotein VIII on said bacteriophage.

12 (Original). A method in accordance with claim 1, wherein said administering is to the olfactory system of the subject.

13-17 (Cancelled).

Appln. No. 10/618,856  
Amdt. dated March 8, 2007  
Reply to Office action of September 8, 2006

18 (New). A method in accordance with claim 1,  
wherein said subject is a human subject and said epitope of  $\beta$ -  
amyloid is an epitope of human  $\beta$ -amyloid.
